- 16. ADJOURNMENT:** **TIME:**

Sep 24/19 10(a.)
Communication

To the Members of the Maple Creek Town Council:

During the Maple Creek Light Horse Association show this past August, there were several comments made by out-of-town participants that there was not adequate signage pointing out where the rodeo grounds are.

Michael Morrow has offered to donate a metal sign with the outside dimensions of 126" (which includes 48" of pipe in the ground) x 54" wide. (See attached photo) The Light Horse Association or a private donor will donate a new insert which says:

"RODEO GROUNDS" with an arrow pointing eastward. We have also talked about putting hooks on the bottom of the sign so that user groups could hang a sign with their own information:

Eg: "Light Horse Show Today"

We would discuss proper placement on Town Property in the sign corridor (by the veterinary clinic) and who would erect the sign with the appropriate people in charge.

We are asking for permission to proceed with this project with all pertinent information you can give us.

Thank you for your consideration in this matter.

J Wendy Morrow

Wendy Morrow

Show Secretary

Maple Creek Light Horse Association.

Subject: Release of Wastewater Systems Effluent Regulations data on Open Government

Hello,

This email is to inform *Wastewater Systems Effluent Regulations* (WSER) regulatees that Environment and Climate Change Canada (ECCC) intends to publish data collected as a requirement of the WSER on the [Government of Canada - Open Government](#) website. The data will include a summary of information gathered in the WSER identification report, monitoring reports and combined sewer overflow reports. The datasets will not include any personal information such as contact names, mailing addresses, telephone numbers and email addresses.

The publication of datasets such as the WSER data supports the Government of Canada Directive on Open Government to maximize the release of data and information of business value. ECCC has received many requests for WSER data through the *Access to Information Act* in recent years, thus the publishing of this data will allow the public to obtain this data easily.

The initial dataset will be published in the upcoming months and it will include data collected from the 2013 to 2017 time period. Additional data will be added on an annual basis as it becomes available.

Regards,

=====

Objet : Publication des données relatives au *Règlement sur les effluents des systèmes d'assainissement des eaux usées* sur le site Gouvernement ouvert

Madame, Monsieur,

Le présent courriel vise à informer les parties réglementées par le *Règlement sur les effluents des systèmes d'assainissement des eaux usées* (RESAEU) qu'Environnement et Changement climatique Canada (ECCC) a l'intention de publier les données recueillies en vertu des exigences du RESAEU sur le site Web [Gouvernement du Canada – Gouvernement ouvert](#). Les données comprendront un résumé de l'information recueillie dans le rapport d'identification exigé par le RESAEU, les rapports de surveillance et les rapports de surverses des égouts unitaires. Les ensembles de données ne contiendront aucun renseignement personnel comme les noms de personnes-ressources, les adresses postales, les numéros de téléphone et les adresses de courriel.

La publication d'ensembles de données comme celui du RESAEU appuie la Directive sur le gouvernement ouvert du gouvernement du Canada qui vise à optimiser la publication des données et des renseignements à valeur opérationnelle. ECCC a reçu de nombreuses demandes concernant les données du RESAEU en vertu de la *Loi sur l'accès à l'information* au cours de la dernière année; la publication de ces données permettra donc au public d'y accéder facilement.

Le premier ensemble de données sera publié au cours des prochains mois et contiendra des données recueillies au cours de la période de 2013 à 2017. D'autres données seront ajoutées chaque année, à mesure qu'elles deviendront disponibles.

Salutations,
